Figure 6. The effect of the number of iterations on the performance of the proposed algorithm. The figure shows the average fitness value (Y-axis) versus the number of iterations (X-axis). The fitness value starts at approximately 0.85 and decreases rapidly, stabilizing around 0.75 after about 100 iterations. The error bars indicate the standard deviation across multiple runs.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions.

1. 2019年12月31日，公司总资产为1,000,000,000.00元，净资产为500,000,000.00元，营业收入为1,000,000,000.00元，净利润为100,000,000.00元。

Figure 1. The effect of the number of iterations on the accuracy of the proposed algorithm. The accuracy of the proposed algorithm increases with the number of iterations. The accuracy of the proposed algorithm is 100% when the number of iterations is 1000.
